

# Jour 3

Présentation devant toute la team :

**Hey everyone,**

I'm Nagib Lakhdari, 26 years old /twenti siks/, and I just joined as an apprentice. I'm currently doing my Master's in system and network architecture & security at ESGI.

I have a background in **system and network administration, cybersecurity, and backend development**. I've worked on managing **secure infrastructures, real-time communication systems, and cloud environments**, and I enjoy problem-solving and learning new technologies.

I'm still waiting for my computer to properly start my training, but in the meantime, I'm getting to know the team. If I have any questions, I won't hesitate to ask! Also, my mentor Abdellah is great, so I'm already feeling well guided.

Looking forward to working with all of you!"
